

April 2021

NOW HIRING

Experienced Process Control Engineer

Pigler Automation, LLC is a successful System Integrator for Process Control and is looking to expand its workforce with the addition of an experienced Process Control Engineer.

Your scope of work will be:

- Successfully lead Process Control Projects within Schedule and Budget, supervise vendors and partners.
- Leading a project team of engineers

The work will be done in a small dynamic team and will be performed in the office as well as on customer site, nationwide and internationally, so you must be available for travel.

Pigler Automation is seeking persons with the following required experience:

- Prior Project Lead experience with customer communication, project scheduling, cost tracking and resource coordination
- Industrial Plant controls integration, upgrading and commissioning
- DCS/SCADA/PLC Process Control programming using software platforms such as PCS7 and/or other control platforms.
- Must be available to travel 25% of the time

Pigler Automation is seeking persons with the following desired experience:

- Industrial communications networking and protocols such as Profibus, Modbus RTU-TCP/IP, Profinet, Ethernet/IP etc)
- Strong familiarity with standard process control documentation (P&ID's, Cause&Effects, IO Lists, schematics, etc)
- Hands on experience with field instrumentation and signals
- VMWare and use of virtual machines along with strong PC skills using Microsoft Office
- Control panel design including creation of control panel layouts, schematics, and BOM's using software packages such as AutoCAD or ePlan
- Cyber Security Training and/or certifications.

Minimum requirements:

- BS or MS in Electrical Engineering, Mechanical Engineering or Chemical Engineering with 3-5 years work experience as a Process Control Engineer. In lieu of an Engineering Degree 10+ years process control work experience may be considered.
- In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire.
- Must have and maintain a valid state issued driver license.
- Accepted candidates will be subject to a civil and criminal background check and drug screening.

Pigler Automation offers:

- Annual salary of \$80,000-\$100,000 and benefits package
- Training opportunities both in technical and management areas of our business.
- The offices of Pigler Automation are a smoke free and drug free environment.
