NOW HIRING

Engineering Intern

Pigler Automation, LLC is a successful System Integrator for Process Control and is looking to hire an Engineering Intern to learn Project and Customer Support Activities.

You will learn:

- Process Control Hardware Design, i.e. cabinet design, layout of control equipment, terminals and cabling.
- Design and Implementation of Software Applications, i.e. Visual Studio programming, SQL data base application and PHP/HTML/web site or AWS programming.
- Design and Implementation of Control Software, i.e. Ladder Logic, SCL programming, HMI configuration, Continuous and Sequential Function Charts engineering.

All aspects of Process Controls Engineering will be part of the work scope.

The work will be done in a small dynamic team and will be performed in the Longmont office.

If you want to jump right in and want to be exposed to all aspects of being an engineer, come to us and "Learn from the Best".

We offer:

A position as an Engineering Intern located in our office in Longmont, CO. Work schedule to be determined. Hourly wage starting at \$15.00/hr paid twice per month. The offices of Pigler Automation are a smoke free and drug free environment.

Minimum requirements:

Enrolled to become a BS or MS in Electrical Engineering, Mechanical Engineering, Chemical Engineering or Computer Science with a focus on Process Control.

- Candidates must be eligible to work in the US.
- Candidates must have and maintain a valid state issued driver license.
- Accepted candidates will be subject to a civil and criminal background check and drug screening.

Additional skills:

- Previous exposure to Siemens or other Process Control Systems
- Familiar with CAD systems (AutoCAD, ePlan)
- Programming experience, familiar with the object-oriented programming concept.

All candidates should be able to display a high level of self-motivation and must be able to work in a group environment. We are looking for a person striving for perfection with a high level of quality in his/her work.

The Company:
